

Worcester Locomotive Society

South Wales Trip - Sun 29th July 1962

This was my first ever trip with the WLS and most definitely my most memorable of all the trips I attended. Walking around deserted valley sheds on a sunny summer Sunday had a special magic to an impressionable 14 year old who had never ventured west of Newport. Errors aside, the list, pretty much as written in my book, appears below. Some engines may well have been seen from sheds and I didn't make any additional notes other than the few engines I cabbed.

I haven't listed those cabbed locos but 7415 at Neath N&B sub-shed sticks in mind. I remember only too well being told off by Terry Dowding when, whilst in the cab, I opened the regulator. I don't know how he knew because as far as I was concerned, the engine was dead - perhaps not!!

It is interesting to note the comparison with the already published list from the November trip later in the year.
