

Worcester Locomotive Society
2-Day South Wales Trip
31 August - 1 September 1963

The following are the records of the trip, as a fourteen year-old, I made with the Worcester Locomotive Society to South Wales in 1963. A time when the Beatles were Number 1 with 'She loves You', England had yet to win the World Cup and Dr Beeching was reeking havoc with the railways.

Having 'found' my records, they hadn't seen light of day for more than 40 years, it was interesting to reflect on the locomotives seen. I must admit at the time I did not spend too much time analysing the sightings.

The advent of Personal computers makes the task so much easier now. First, I painstakingly updated my Autumn 1962 Loco Shed Book with all the allocation changes and withdrawals to bring it up-to-date for the time of the visit. Secondly I entered the locomotives into Excel and then checked the shed allocations and withdrawal status of each one. Lastly, I checked the locomotives against the preserved GWR locomotive list.

The visit to the scrap lines at Barry makes interesting viewing and the large number of these locomotives that were spared the cutters torch. Quite a few other 'live' locomotives also made it into preservation. However, the fate of 9499, the shortest lived GWR designed locomotive (4 years and 2 months), dead on the Barry scrap line was to be eventually cut-up.

Please note:

- Locomotives are on their own shed except where indicated
- Withdrawn locomotives appear at the end of their class list
- The allocation of 'mainline diesels is not shown
- Unfortunately, my records do not indicate whether the locomotives were on the shed, in the yard, station or passing through; just that they were seen at the location.
